

lamb finisher pellets

safe balanced feed

Johnson's lamb finisher pellets are a hay/grain balanced production pellet specifically formulated for growth and fattening of lambs.

A balanced complete feed, processed with hay, straw, cereal grains, legumes, molasses, vitamins and minerals reduces the risks associated with selectivity and provides a safe diet high in energy and protein for rapid growth.

Benefits of Hay/Grain Based Pellets

- ✓ Fibre stimulates rumination and reduces the risk of acidosis
- ✓ Lambs do not require additional access to hay or straw once accustomed to pellets
- ✓ The pellets are balanced for calcium and phosphorus to reduce the incidence of urinary calculi formation
- ✓ Reduced wastage

Typical Analysis (DM basis)

Energy (Ruminant ME)	12MJ/kg
Crude protein	16%
Equivalent crude protein	1.2%
Urea	0.4%
Lasalocid	Nil
Acid buf	✓

Ingredients Selection

JT Johnson and Sons range of feeds have been formulated from a selection of the following ingredients; barley, wheat, oats, legumes, almond hulls, oat meal, cereal hay and straw, legume hay and straw, molasses, vegetable oil, vitamin and minerals.

Direction for Use

- Lambs should be given a minimum of 3 days free access to high quality hay prior to introduction to Lamb Finisher Pellets.
- Gradually introduce the pellets over a 7-10 day period with hay or straw remaining available to lambs during this time.
- Hay can then be removed, and pellets fed ad - libitum.
- Expected feed intake is 3-4% of liveweight per head per day.
- Ensure clean fresh water is always available.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL

Withholding Period

Meat - Nil
Wool - Nil

Pellet Presentation

- ✓ 6mm diameter

Order Size

Bulk
Bulk bags 1t or 1.2t
20kg bags

Storage

Store in a dry, cool place that is free from pests and vermin
Best used within 6 months of the date of manufacture
