

drought pellets

safe balanced feed

Johnson's Drought pellets are a roughage based pellet that can be used to support your sheep and cattle through times of severe feed shortage.

A complete feed, processed with hay, straw, barley, almond hulls, oatmeal, molasses, vitamins and minerals provides a safe diet for sheep and cattle.

Benefits of Hay/Grain Based Pellets

- ✓ Fibre stimulates rumination and reduces the risk of acidosis
- ✓ Do not require additional access to hay or straw once accustomed to pellets
- ✓ The pellets are formulated with macro and micro minerals and vitamins
- ✓ Reduced wastage

Typical Analysis (DM basis)

Energy (Ruminant ME)	9MJ/kg
Crude protein	9-10%
Equivalent crude protein	2.8%
Urea	1.0%
Monensin	Nil

Ingredients Selection

JT Johnson and Sons range of feeds have been formulated from a selection of the following ingredients; barley, wheat, legumes, soya bean meal, almond hulls, oat meal, legume hay and straw, cereal hay and straw, molasses, vegetable oil, vitamin and mineral premix.

Direction for Use

- Gradually introduce the pellets over a 7-10 day period, preferably with hay or straw available to stock
- Once accustomed to feed hay/straw can be removed and pellets fed ad-libitum
- Consumption will vary with liveweight of animal and the availability of any other feed
- Typical feeding rates are between 1.5% to 2.5% mature liveweight
- Ensure clean fresh water is always available

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL

Withholding Period

Meat - Nil
Wool - Nil

Pellet Presentation

- ✓ 9mm diameter
- ✓ 580-600kg/m³ Bulk Density

Order Size

Bulk
Bulk bags 1t or 1.2t
25kg bags

Storage

Store in a dry, cool place that is free from pests and vermin
Best used within 6 months of the date of manufacture
