

livestock conditioner pellets

Safe balanced feed

Johnson's Livestock Conditioner pellets are a balanced pellet specifically formulated for maintaining the condition of sheep and cattle, or assisting to meet pasture quality and quantity shortages.

A balanced complete feed, processed with hay, straw, cereal grains, legumes, soyabean meal, vegetable oil, vitamins and minerals reduces the risks associated with selectivity and provide a safe diet for sheep and cattle.

This pellet can also provide a safe introductory diet for livestock entering a feedlot. It allows a smooth transition to the lamb finisher pellet or cattle booster pellet which are high in energy and protein necessary for optimal growth.

Benefits of Hay/Grain Based Pellets

- ✓ Fibre stimulates rumination and reduces the risk of acidosis
- ✓ Do not require additional access to hay or straw once accustomed to pellets
- ✓ The pellets are formulated with macro and micro minerals and vitamins
- ✓ Reduced wastage

Typical Analysis (DM basis)

Energy (Ruminant ME)	10MJ/kg
Crude protein	12%
Equivalent crude protein	2.3%
Urea	0.8%
Monensin	Nil

Ingredients Selection

JT Johnson and Sons range of feeds have been formulated from a selection of the following ingredients; barley, wheat, legumes, soyabean meal, almond hulls, oat meal, legume hay and straw, cereal hay and straw, molasses, vegetable oil, vitamin and mineral premix.
