

Cattle Finisher Pellets

Antibiotic free stockfeed

Johnson's cattle booster pellets are a hay/grain balanced production pellet specifically formulated for growth and fattening of cattle

Benefits of Hay/Grain Based Pellets

- √ Hay fibre stimulates rumination and reduces the risk of acidosis
- √ The pellets are balanced for calcium and phosphorus to reduce the incidence of urinary calculi formation
- ✓ Reduced wastage

Typical Analysis (DM basis)

Energy (Ruminant ME)	12MKJ/kg
Crude Protein	15%
Equivalent crude protein	1.2%
Urea	1.0%
Acid buf	

Direction for Use

- Cattle should be given a minimum of 3 days free access to high quality hay prior to introduction to Cattle Booster Pellets
- Gradually introduce the pellets over a 7-10 day period with hay or straw remaining available to cattle while feeding pellets
- Expected feed intake is 2-4% of liveweight per head per day
- Ensure clean fresh water is always available

Ingredients Selection

barley, wheat, legumes, soyabean meal, almond hulls, oat meal, legume hay and straw, cereal hay and straw, molasses, vegetable oil, vitamins, minerals & Bovacillus,

*Bovacillus™ contains two strains of Bacillus bacteria (Bacillus subtilis DSM5750 and Bacillus licheniformis DSM5749) which were selected based on multiple criteria, one of which is their capacity to produce enzymes. These enzymes can assist with the digestion of feedstuffs fed to cattle and other ruminants Bovacillus™ is a registered trademark of Chr Hansen

Withholding Period

Meat - Nil

Pellet Presentation

- √ 6mm & 9mm diameter
- √ 580 640kg/m3 Bulk Dkg/m3

Order Size

Bulk, Bulka bags (1t or 1.2t) and 20kg bags

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL. STORE IN A COOL DRY PLACE
