

Johnson's

Feeding the animals that feed the world

Drought Pellets

Antibiotic free stockfeed

Johnson's Drought pellets are a roughage based pellet that can be used to support your sheep and cattle through times of severe feed shortage

Benefits of Hay/Grain Based Pellets

- ✓ Benefits of Hay/Grain Based Pellets
- ✓ Fibre stimulates rumination and reduces the risk of acidosis
- ✓ Cattle do not require additional access to hay or straw once accustomed to pellets
- ✓ Reduced wastage

Typical Analysis (DM basis)

Energy (Ruminant ME)	9MJ/kg
Crude Protein	9 - 10%
Equivalent crude protein	2.8%
Urea	1.0%

Direction for Use

- Gradually introduce the pellets over a 7-10 day period, preferably with hay or straw available to stock
 - Once accustomed to feed hay/straw can be removed and pellets fed ad-libitum
- Consumption will vary with liveweight of animal and the availability of any other feed
- Typical feeding rates are between 1.5% to 2.5% mature liveweight
- Ensure clean fresh water is always available

Ingredient Selection

Barley, wheat, legumes, soyabean meal, almond hulls, oat meal, legume hay and straw, cereal hay and straw, molasses, vegetable oil

Withholding Period

Meat - Nil

Pellet Presentation

- ✓ 9mm diameter
- ✓ 580-640kg/m³ Bulk Density

Order Size

Bulk, Bulk bags (1t or 1.2t) and 20kg bags

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL. STORE IN A COOL DRY PLACE
